

CONGRATULATIONS!!!!

WINNER OF THE PROPEEL COATING COMPETITION; David Hitzler, Bostik.

Thanks to all of you who entered the Propeel competition. There were some fantastic ideas and the standard was very high. Well done to winner David Hitzler, Technical Manager at Bostik, who got the highest score, suggesting the use of Propeel in nurseries for protecting a number of surfaces from the 'residues' produced by babies and young children. Based on originality and creativity this was voted the number one entry. David will receive his prize, a case of South Australian Shiraz, in time for Christmas.

Additives partner, ADDAPT CHEMICALS, exhibiting at Chinacoat

This years CHINACOAT will once again be held at the **Shanghai New International Expo Centre (SNIEC)** on November 20-22, 2013.

As a producer of additives, **ADDAPT Chemicals BV** will be one of the exhibitors at CHINACOAT 2013. They will be present at the booth of their respected Chinese distributor 'Shanghai Yingshui Trading Co., Ltd' on November 20th and 21st. Dr. Willem van Gerresheim (Managing Director), Mr. Victor Hofmans (International Sales Manager) and Mr. Hartmut Frenzer (Technical Application Manager) will be present at the booth to welcome you!

For more information on CHINACOAT 2013 please visit www.addapt-chem.com or visit www.chinacoat.net.

News from the editor...

This edition is a little later than usual but covers the half month of December when everybody can finally enjoy a break from what has been a pretty tough year for most.

At Protective Technology, we will be working and available up to the 20th December and returning week commencing 6th January. We might not be at full strength for all of this time but we are always happy to answer the phone and handle any queries, no matter when you call.

I would like to take this opportunity, on behalf of Protective Technology, to thank all our customers, suppliers and support operations for their support and efforts over the last 12 months. It has been a pleasure working with you all and we look forward to an active and prosperous 2014. Our best wishes to all of you and your families for the festive period and beyond.

Andrew.

THE POWERS THAT BE have restricted the use of a particular component used in the production process of our naturally derived emulsion stabilizer; INUTEC SP1t, (manufactured in Belgium by Creachem). The restriction means that this particular ingredient and, in turn, the resulting product; the Inutec powder, are no longer available. However, Creachem had foreseen such a restriction and have already made available an alternative version of the Inutec: INUTEC SL1. This is the very same polymer but carried in glycerol and in slurry form at approximately 25% activity. Please drop us a line if you require more detail.

AWARD WINNING TECHNOLOGY

We are proud to announce that Ultra-Fresh DW-56 took home the Showstopper Award for best new product in the Chemical and Coatings division at the IFAI 2013 exhibition in Orlando recently. This would be Ultra-Fresh's second year winning the award in this category as Ultra-Fresh DW-30 took home the title at IFAI 2012 in Boston.

Ultra-Fresh will be exhibiting at Heimtextil in January. The show is on from the 8th to the 11th January and the Ultra Fresh stand is J53 in Hall 8.0. If you are heading that way, please let us know and we will give TRA the heads up and make sure you get a cup of coffee and a biscuit!

A VERY MERRY CHRISTMAS AND HAPPY NEW YEAR TO ALL OUR FRIENDS, COLLEAGUES AND ASSOCIATES...

Protective Technology
